

Have you seen rabbits in your local area?

RabbitScan is a new web-mapping system for landholders and the community to record rabbit problems.

- Record sightings, warrens, dung heaps, impacts, and control activities (such as baiting or warren ripping).
- Keep local authorities informed about current problems.
- Work together to identify priority areas for control.
- Create an online group for your landholder network.
- Receive updates about local rabbit control programs.
- Visit www.rabbitscan.org.au or download the App.

FeralScan is hosted by the Invasive Animals CRC and supports regional pest control organisations and landholder groups.

How to record rabbit activity in RabbitScan

Option 1. Go to the website
www.rabbitscan.org.au

Register your details and Login, or record data using your email address.

Map where you have seen rabbits, warrens, damage, and control actions.

Submit your record, and view it on the Map. View other records in your local area.

Option 2. Download the Mobile App (Apple/Android).

Download App
